## PROJECT SUN STREAK (U)

ERV SESSION PROCEDURES REPORT

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

CONTROL NUMBER: 8610

NICKNAME: NONE

DATE OF SESSION: 12 Sep 86

TARGET COUNTRY: UNKNOWN

REFERENCE: SPR-003-86, DTD 29 Jun 86, SAB

SESSION NUMBER: 04

DATE OF REPORT: 15 Sep 86

MISSION STATUS: CLOSED

TECHNIQUE UTILIZED: ERV

SOURCE IDENTIFIER: 101

052  
0912  
0945

1. ( ) TASKING: The Interviewer was told that previously reported data was adequate to confirm that Source had in fact acquired the proper site. It was important however to note that future sessions should not concern themselves with the on-going activities of the site but rather the activities of the site (specifically [REDACTED] at the site) one year into the future. In other words, the actual intelligence question is whether the activity is continuing one year from now and not what the actual activity is. During this session Source was told, "This is a target we have worked before. I will be asking you to acquire the site and to move to a specific building on the site: [REDACTED] I will want you to take a tour of the building, learning the overall purpose of the facility as well as identifying areas of special interest. Following your tour I will ask you to tell me about the building and provide you other tasking." Source was not told that the purpose or intentions of this session would be a time travel into the future. Source was provided the previously encrypted coordinates of the site. No further cues or descriptive data was provided to Source.

SG1A

2. ( ) SESSION: There were no personal or environmental inclemencies known to the Interviewer which may have influenced the results of this session. The session was conducted utilizing only standard Extended Remote Viewing (ERV) protocols.

3. ( ) SUMMARY:

a. ( ) (NOTE: The following narrative, (within quotation marks), is an abridged copy of Source's post-session written summary. This summary has been editorialized (as indicated), by the undersigned for clarity, grammar and structure. The actual unabridged summary is maintained in the mission field dossier at this location along with any other material produced during this session, e.g., sketches, notes, etc.). "(The) site is a fenced in compound with a mixture of old and new buildings. (The) area (around the site) has a woodsy (forested) feeling. Building [REDACTED] is a large multi-storied building. [REDACTED] is fairly new. (The word) "substantial" (is key to the description of [REDACTED] (The activity in [REDACTED] is to improve on what is already known as opposed to discovering new unknowns. Parts of [REDACTED] have a sterile, scrubbed feeling and a smell of antiseptic. (There is also a (smell of "Blue" (an unknown/abstract reference with some importance to the site). (In one) area (there is a place) where liquid

chemicals are mixed (and/ or ) combined. (In another( area is a large device (mounted) on something resembles( a machine-gun swivel. This device is a muted, shiny grey color on the outside with a (cylindrical) (component). (The cylindrical object) is also muted grey on the outside but (has) a rough black finish on (the inside- the word Teflon describes the texture). This (cylindrical( device is "very, very" (sic) resistant to heat. Perhaps in the same area (where the concept of) ground (precision) glass in various shapes and sizes (is important). (This) glass is thick and is concerned (related) to the use ( of light. (The concepts) of light (being) refracted (while other ) light passes through (is important). (In another area of [REDACTED] is a tiered (structure containing various machines). (There are) a large number of men working with these machines but their purpose (the machines) is only an auxillary function (to the actual purpose) of the site. There are four other machines here that are light tan in color and look like key punch machines. (in another area of [REDACTED] is a large room with what appears to be a gallery across the top similar to an operating (theatre). On the floor of this room is an oblong object that looks like a long table made of man-made materials. This room is also only an auxillary site to the (main) purpose of the building. One year from now there is (a) much more military feeling (about the site). Whereas, earlier most of the military (at [REDACTED] had been specialists, SG1A now the military (are part) of an entrenched military (stye) bureacracy. The purposes of the building (have been channelized) to become more specific (in its roles). (The concepts) of brainstorming, "barnstorming (sic)" were encouraged (earlier). People had (the) freedom to follow (projects) to conclusion. Now the (concept of) "management by objectives" is ( the operant philosophy). Individualism, "freewheeling" and imagination are ( no longer) acceptable. Youthful exhuberance and curiosity are gone, replaced by a somber, "job to do by deadline" attitude. Many of the (projects) from a year ago have been dropped now in the future. A year in the future, when I queried a man in a brown uniform containing many medals, if the work (from a year ago) had been successful he replied "successful enough." (The work ) done then provided the basis for the work now going on a (year in the future). (The work) has been pared down and altered (due to the elimination of free and unrelated research) and is now more channelized and regimented.

b. ( ) During the actual session, Source reported other data which may impact on the final assessment of this target. That data is listed below in raw unevaluated form:

(1) ( ) In the "tiered room" there are banks of electronic devices, one device has an idented area similar to a screen but not a screen. In this area of the machine some substance, "not a solid, perhaps a vapor (gas)" can be seen to change colors. The predominant color impression is deep blue.

(2) ( ) Other words used to reference the "long oblong table" included; narrow, shiny, hard manmade substance (possibly silicone) and the color black, near the table, appearing to be neatly stacked in the corner were numerous items resembling "directors chairs."

SG1A

SG1A

(3) ( ) The move to one year in the future revealed that [REDACTED] is not as active as the previous year. Several "programs" have been eliminated completely while others have been pared drastically. These actions seem to be in conjunction with a new "directed" concept of work. Unimportant, unproven and unrelated work has been halted and all efforts, now apparently under the control of the military, are being focussed on narrow areas of continuing effort. These efforts are the result of the earlier free and more/dyanmic research efforts.
